

TYPE FL50P

Type FL50P is a special construction float switch with all wetted parts made of Non metal materials. This type is designed for monitoring liquid levels for highly demanding applications such as corrosive media and liquid and harsh environment compatibility.

The float switch can be equipped with one or more point switches (floats) and a variety of process connections are available. The standard case material for immersed parts is polypropylene or PVC.

Type FL50P is available in a variety of features and options to meet users' specific requirements, including:

- Number of Floats
- Process Connection
- Material
- Dimensions
